FRESH SUMMER RED WINE

Lionel Osmin & Cie

LE SUD-OUEST... VIVRE, BOIRE ET MANGER.

PROFILE:

It is sometimes difficult to find a wine that everyone is happy about, especially during the summer. We have tried to find an answer to that problem by creating this summer red wine. This cuvee will satisfy those who think that rosés are too simple and the customers that prefer red wines... There is finally a red wine that we can put in the fridge or in the small rivers when we go hiking in our beautiful Pyrenees Mountains.

WINEGROWING:

- Grape variety: Tannat – Merlot – Négrette – Cabernet Franc
- Climate: mainly oceanic influences with some Mediterranean touches in mid-summer.
- Terroir: we have searched for different terroirs all around the South West region. Every single one of them brings its personality. More than a certain type of soil, we try to express the grape varieties in this wine.

WINEMAKING & AGEING:

The blending is very important here. We had a goal and we needed more than 8 tanks to finally accomplish this cuvee. Some tanks had straight pressings, others have macerated for a few days... It is hard here to specify the vinification process that has emerged in our winemaker's brain... The blending was done in January and bottled straight after.

TASTING NOTES:

Redcurrant colour with shiny shades. The nose is both ripe and fresh on red fruit notes with small flower aromas. The palate is surprising, the attack gentle and fresh followed by a full-bodied middle that is waiting on the tannins... But the tannins don't come as they are replaced by great roundness and fruity notes.

SERVING & PAIRING:

- Service temperature: 8 °C
- Ageing potential: 1 year
- Food pairing: aperitif, salads, tomatoes with mozzarella, grilled fish, Italian cuisine, Asiatic cuisine, red fruit desserts...

EAN: 3760201501528
Weight: 1.4 kg
